NutriSea® Testimonials for Sea Jerky® for Dogs

“I am writing to share with you our experience with using your product Sea Jerky in our five year-old Rottweiler, Panzer. Panzer had a genetic deformity in her back “knee joints” which resulted in surgeries in both legs. [After slipping on ice and a second surgery] she often walked on three legs...since the surgeries, we have tried everything to help her, including Rimadyl and steroid injections into the joint. On the recommendation of a friend we then tried Sea Jerky.

....second week I started to notice a difference...Panzer was getting up easier and walking better. **By the time the third week came, the benefit was dramatic.** I took Panzer for a swim in the lake and was shocked when she jumped off the dock...**I want to thank you for developing a product that gave our pet a completely new lease on life.”**

“I decided to try a bag of your Sea Jerky for our 8 1/2 yr old Mastiff mix, Riley, who's hips/back legs are not working well. I will admit I was a bit skeptical, but he is our baby and it was worth a try. WOW, I am singing the praises of your jerky EVERYWHERE! For the first time in a while our 150lb guy is running without wobbly legs, playing with our other dogs - he is like a puppy again and his mental state is SO HAPPY! The other night he even climbed the stairs to sleep in our bedroom which he hasn't done in a few years. I have since restocked and bought a large container of your jerky to keep him going.

THANK YOU!”

"Our 7 year old Boxer was diagnosed with degenerative disk disease. After 2 months on Duramax, an anti-inflammatory medication, he still struggled to get around. I, personally, have been taking the ArthriSea for my arthritis and have had tremendous results, so I decided to try the Sea Jerky for our Boxer. WOW! Not only does he LOVE the jerky, he doesn't even walk with a limp anymore. I would highly recommend all of your products, human and animal! Thank you!!"

L. Shafer,

"Dear Coastsides... we love & appreciate Sea Jerky. ... Many clients have now switched from products like Cosequin to Sea Jerky and say that it seems to work better.

Thank you so much for making this wonderful product. Our doctors, staff, client and patients all love it greatly. **There is nothing better than making a pet feel better and have less pain**, and when you can do it and the dog enjoys the treatment as well, you know you have found something wonderful! Keep up the good work!"

I recently had your product recommended to me. My 14 year old Norwegian Elkhound had severe hip dysplasia and has been on glucosamine for 8 years. Your product not only made her more comfortable but even spunky. She can now take on the 5 month old retriever she lives with. Thank you so much for your wonderful product.

I have really seen an overall improvement in my dog, by the way she acts I can tell she really feels so much better. She is a 10 year old English Springer Spaniel with hip dysplasia in both hips. And she has some skin allergies it is helping with. Great product! Thank you.

Jacqueline
Asheville, NC

“At a young age, Rocky Bear, golden retriever/black lab mix, was diagnosed with chronic hip dysplasia in both hips and both knees were blown. After surgeries and years of trying various joint support remedies such as large doses of Glucosamine and MSM as well as pain meds, Rocky began having non-stop trembling in his hind end. I realized I had to be a responsible pet owner and do the humane thing.

I called my Vet and she shared they had just started using a new product, Sea Jerky, on some of their patients with older dogs with chronic arthritis and hip dysplasia--as well as the vet’s wife was using the human form on herself for her knees. I agreed to try it and started Rocky on half dose of Sea Jerky to make sure he wasn't allergic per my vet's instructions. By the third week, the trembling in the rear had completely stopped (no prescription pain meds) and he was putting both legs down on the ground together. I praised God for not letting me put Rocky down. By the sixth week he was lifting his leg to pee, I jumped up and down and called the vet right away like an excited little kid telling everyone “Rocky is lifting his leg while he is peeing”!

By the end of the ninety days he was running, going up and down stairs --he was alive and happy!!! Now Rocky has been on a full daily dose for a while and even with his age and extra weight (100+lbs), he is not only going up and down stairs with ease, he plays fetch and jumps up and down like an over-sized pup. He's getting gray hairs and has a way better quality of life than he has ever had since he has been taking full dose of Sea Jerky and I will give it to him for the rest of his life without question.

I will forever be grateful to Coastside Bio for creating this product and making it available to Rocky and all other human and animal sufferers of chronic joint issues and pain.”

Thank you,
Lucinda S from MN

Sea Jerky is awesome! My 8 year old Akita was starting to show signs of aging because she would limp after laying on the floor, but after a few months of eating Sea Jerky, she doesn't limp anymore! She's her usual spunky self!

I have just got to write you to tell you about my westies experience with Sea Bones. Abby had injured her leg after jumping from our couch when playing with my mom's dog and was unable to walk on her rear foot. I refused to use the Rimadyl that her dr. wanted her to take. I instead did some research and found Coastside Bio Resources and the Sea Bones, which I ordered and used. She became a new dog and was now able to climb steps and jump and was even playful when she hadn't been before. This has been about 4 years ago and she is on this supplement every day. She is 10 years old now and we still marvel at what a change the Sea Bones have made in her.

We just finished our first bag. This supplement worked so quickly for our dog who has suffered from Lyme Disease twice. Thanks!
Laurie Sterling, CT

I adopted Sara at 10 weeks of age. After two weeks I noticed a "hitch" in her gait and took her into our Vet who didn't think anything was wrong. But I insisted on X-rays and she was diagnosed with hip dysplasia. In my research I came across your product and started her on one stick every morning. She is now 11 years old and hasn't missed one single day of getting her Sea Jerky. Dr. Hanks, our vet, calls her the poster child for hip dysplasia. He truly can't believe how remarkable she has done for her size and severity of the dysplasia. He made the diagnosis 11 years ago and never expected her life to have the quality is has had and continues to have. Thank you for a wonderful, life-saving product.

Glenburn, ME

My dog Maya has been using Sea Jerky for two years now. I have seen a noticeable improvement in her agility and ability to run and play with the other dogs. She has had knee surgery on both hind legs, as well as disc surgery for degenerative disc disease. I firmly believe your product has greatly improved the quality of my dog's life. Thank you.
